# PROTECTION OF THE PUBLIC POLICY

Recognizes its responsibility to the broader community and the role it must play in protecting the public.

All our officers are empowered to report suspicious activity and behavior to the police.

There is also an expectation that if our officers see evidence of criminal activity or anti-social behavior during their day-to-day duties, they will report it directly to the local police or do so via their control center. If they identify such incidents, the officers are instructed not to put themselves at risk of harm or injury. The officers also receive similar instructions if they identify vulnerable people who may require protection to ensure their safety.

Management team members will encourage all employees to get awareness training in ACT. This initiative, led by NACTSO (the National Counter Terrorism Security Office), asks businesses and other organizations to consider their preparedness for terrorist attacks. It explores what is likely to happen in the event of a terrorist attack and identifies the measures that can assist in preventing, handling, and recovering from such an incident.

Our Security Guards are trained to identify vulnerable people and know what steps to take to protect them. The aim is to enable Security staff to support police in actively ensuring public safety.

Comet Security Services Ltd recognizes its responsibility to the broader community and the role it must play in protecting the public.
