

Corporate Social Responsibility Policy

This policy sets out our view of our corporate responsibilities for the environment and communities in which we operate and for the well-being of our staff, partners, public and clients. Some of these responsibilities are spelt out in more detail in other documents.

Every person we work with and for makes essential and unique contributions to the community, their organisations, and our work. We appreciate and honor their diversity in every way it manifests itself. We encourage diversity as a basis in all our interactions with the community and our partners, associates, employees, and clients.

We acknowledge our responsibility to care for our employees, to provide them with meaningful employment through which they can support themselves and their families, and to do everything possible to ensure their ongoing workplace welfare, health, and safety.

We are committed to ensuring the security and safety of our clients and the general public. We attempt to safeguard their property, including intellectual property, just as we would protect our own.

Through our Environmental Policy, our Policy on Equality and Diversity, and our Health and Safety Policy, we seek to improve and maintain the environment in the communities in which we operate. We oppose both child labour and forced labour and do not engage in either practice.

We at Comet Security Services Ltd. pride ourselves on always treating our employees, business partners, and clients in an honourable and honest way.
